In Melora's World:

SAFE FOR SECURITY

With airline restrictions only becoming stricter with the New Year, travelers need an efficient way to transport liquids and gels without having them confiscated. The stylish Clear Bag System is a toiletry case that follows airplane regulations. The case will ensure a faster checkpoint experience and will ease the hectic activities surrounding airport travel. The small case is designed to fit inside carry-on luggage without spilling its contents onto documents or electronics. It contains five environmentally safe reusable containers to hold and dispense shampoo, lotion, and other liquids. In the bag, there is additional space for cosmetics or deodorant and toothpaste. For more information, visit www.clearbagsystem.com. **PA**
