AT HOME IN THE MODERN WORLD

PRODUCT OF THE DAY

Travel Bag

If design is a response to the problems of the day, then why not a new breed of luggage to help us navigate heightened security? Just in time for summer travel, 3-1-1 Travel is introducing the Clear Bag as an alternative to the ziplock bag now required for carry-on liquids. Under federal regulations travelers can only carry on liquids, gels, and aerosols in clear containers weighing 3 oz. or less. The Clear Bag complies with regulations, and it has five reusable containers that dispense shampoo, lotion, and other toiletries.
